Subject: Recoat 291 Floor U&P Letter

Mr. Kacandes,

Please see the attached Use and Possession letter for Contract N400851D0535 Task Order 0005.

Congratulations on the successful completion of this task order. Once again, your team flawlessly completed an important project in a critical facility ahead of schedule with zero safety mishaps and outstanding quality. You also displayed excellent teamwork with the government in negotiating a substantial modification to add the radon mitigation system to the scope of work and in working to de-conflict several issues in the field. Working in a Navy nuclear facility is never simple, but you and your team made it look easy.

Very Respectfully

LT Sam Lee, CEC, USN

Construction Manager
